

(a) two competing consumers

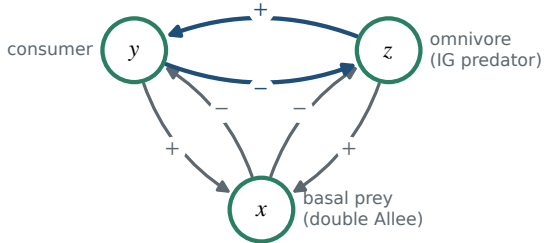

competition ($-c_{12}, -c_{21}$)

both 3-cycles $> 0 \Rightarrow L_3 > 0 \Rightarrow \kappa < T_1$: no-go

(b) intraguild predation

intraguild predation ($-h, +e_3h$)

3-cycles of opposite sign $\Rightarrow L_3 < 0$ if $e_1 e_3 > e_2 \Rightarrow \kappa > T_1$ reachable
